Question

How to display related records for new bib linking profile in WebVoyage?

Answer

Once profile set up in System Administration, note profile code & edit WebVoyage skin

In webvoyage.properties:

1. Set option.loadRelatedRecords=Y
2. Add definition for bib linking profile, where profile code (from SysAdmin) is NNNN:

```
holdingsInfo.relatedRecords.profile.NNNN=  
holdingsInfo.relatedRecords.profile.NNNN.link.pretext=Click  
holdingsInfo.relatedRecords.profile.NNNN.link.text=here  
holdingsInfo.relatedRecords.profile.NNNN.link.posttext=for related items
```

3. Save changes.

In displaycfg.xml:

1. Add field display, where profile code is NNNN:

```
<displayTags label="Related Records">  
<displayTag field="3500" profileMatch="NNNN"/>  
<displayTag field="3500" profileMatch="ISSNCOMP"/>  
</displayTags>
```

2. Save changes.
