Question

How to set-up publishing to PubMed from Alma?

Answer

1. Configure a Publishing Profile, as described in the [Online Help](#).

See a related KCS article: [What is the URL to Provide Vendors for Alma ViewIt Window Link and Resolver Icon?](#)

Note

Effective at the end of 2019, PubMed will be consolidating their LinkOut services, transitioning to Outside Tool only (called "Library LinkOut"), which will eliminate the option to upload holdings files to PubMed. See [announcement](#) from NLM for more information.

2. Define an integration profile so the OpenURL can resolve (interpret) the PMID

Described in the [Online Help](#) as well.
