
How to add more quick limit options

- **Product:** Voyager
-

Question

How to add additional quick limits available on Basic search page?

Answer

1. `cd /m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/<skin>`
2. Open `webvoyage.properties` for editing.
3. Find the "Limit To" section and add additional limits in format specified in file.
4. Save changes.

Additional Information

Example lines to add for limit to specific location:

```
page.search.limitTo.Main=  
page.search.limitTo.Main.limit=LOCA=Main  
page.search.limitTo.Main.order=5  
page.search.limitTo.Main.text=Main Library
```

Where LOCA= value is the *Location Limit Group name* in System Administration

You can use this handy SQL query in Prepackaged Access Reports to identify the Voyager Locations that are associated with Location Limit Groups:

```
SELECT LOCATION_LIMIT.LIMIT_NAME, LOCATION_LIMIT.LIMIT_CODE,  
LOCATION_LIMIT.SUPPRESS_IN_OPAC, LOCATION.LOCATION_DISPLAY_NAME,  
LOCATION.LOCATION_NAME, LOCATION.LOCATION_CODE  
FROM (LOCATION_LIMIT INNER JOIN LOCATION_LIMIT_LOCS  
ON LOCATION_LIMIT.LOCATION_LIMIT_ID = LOCATION_LIMIT_LOCS.LOCATION_LIMIT_ID)  
INNER JOIN LOCATION ON LOCATION_LIMIT_LOCS.LOCATION_ID = LOCATION.LOCATION_ID  
ORDER BY LOCATION_LIMIT.LIMIT_NAME, LOCATION.LOCATION_DISPLAY_NAME;
```

Note

Constructing custom SQL queries by request and troubleshooting unexpected results from customer-created SQL queries falls outside the scope of Support. The above has been posted for informational purposes. [Voyager-L](#) and [Developer Network](#) are useful resources for finding helpful custom SQL or obtaining assistance from peers in troubleshooting custom queries.

See the [WebVoyage Architecture Overview and Configuration guide](#), Chapter 4.
