Question

In the Aleph OPAC, where does the text "The library does not have accessible items" come from? (It is **not** present in any of the `./error_eng` files where such text is usually found.)

Answer

This text is in the `./www_f_eng/item-global-body-no-item` file. There are other cases where OPAC text is in the `./www_f_eng` as well.
