## MARCIVE Loader p-file-99: reports all previously-loaded records

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

When I look at the log file after running p-file-99, the log registers all the records that were either updated or created. However, it also reports previous records loaded. I loaded 180 records, but the log shows 362 records. Look at \$alephe\_scratch/abc01\_p\_file\_99.00087.

### Resolution:

This was occurring because the new counter for the Marcive Load Log had not been created. This counter (last-loader-log-no) is explained in the V.18 Marcive documentation - How to Use the Marcive Document Loader (file-99).

I added this to ABC01 using UTIL G/2. This same counter is used by the OCLC loader.

This corrected the problem.
