
How to change space around record display

- **Product:** Voyager
-

Question

How to increase or decrease whitespace around record information in a Record Display?

Answer

1. cd /m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/{skin}/css
2. Open displayCommon.css for editing.
3. Find .bibTags ul section and edit the "margin:" value to adjust amount of whitespace surrounding display sections:

```
.bibTags ul
{
list-style-image:none;
list-style-position:outside;
list-style-type:none;
margin:0px;
padding:0px;
}
```

4. Add comment to file to mark change and save changes.

Additional Information

As with many customizations, there may be other methods for achieving the same result.
