

Where do the widgets come from?

- **Article Type:** Q&A
 - **Product:** Alma
-

Question

On the Alma start page there is an "Add widget" button. Where do these widgets come from, and how can I change the available widgets?

Answer

The widgets that you see in the menu come from three different places:

- * the first four widgets are canned widgets that are available everywhere.
- * you can define additional widgets in General Configuration Menu / Customize Widgets.
- * then you have the Analytics widgets which you can define in Administration / Analytics / Configuration Menu.
