
ADAM object rotation

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 22
-

Question

When viewing ADAM objects in the OPAC you see a picture correctly in the thumbnail but when viewing it in “full view” it’s rotating in Google Chrome. This does not happen for all pictures but only randomly. It’s not happening with Mozilla Firefox. What’s the reason for this behavior?

Answer

This is a browser issue and has nothing to do with Aleph. Please see also the following link:
