## Is there an Oracle 11g ODBC Installation Guide?

- **Product:** Voyager
- 

### Question

Is there an Oracle 11g ODBC Installation Guide?

### Answer

Voyager no longer supports the 11g ODBC drivers.

Voyager supports the *10g* (32-bit Access) and *19c* (64-bit Access) ODBC drivers. Which ODBC drivers you install depends on your your version of Access (32-bit or 64-bit); however Support *strongly encourages* the installation of the 10g ODBC drivers for 32-bit Access.

### Additional Information

See [Overview of version requirements for Voyager ODBC drivers](#) for information about Voyager version compatibility considerations and which ODBC drivers you should install.
