

How to block patron from logging into WWW OPAC

- **Article Type:** General
 - **Product:** Aleph
-

Desired Outcome Goal:

Is there any possibility to block patron from logging into WWW OPAC?

Procedure:

All blocking functionalities are valid only for circulation or acquisition purposes but not for logging in to the OPAC. The only way to avoid a patron from logging in is to delete the patron record. For expired patron records this could be done using the service "Delete Patron Records (cir-23)".
