Question

Delete Unlinked Headings (manage-15)" takes very long for finishing. Is this normal?

Answer

Delete Unlinked Headings (manage-15)" reads every single record in the database and therefore takes a long time. The more records are in the database the longer is the runtime. It can be speed up by assigning more than 1 process in the service. Moreover the service does not lock the library so that working (cataloging etc.) in parallel is possible.
