## Changing URL characters in "Global Changes (manage-21)"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Desired Outcome Goal:

Using the service "Global Changes (manage-21)" an error message appears when trying to change text in an URL because some characters are not allowed to change.

### Error message:

The following characters can not be used ?{'^> ,

### Procedure:

Unfortunately it's not possible to use some specific characters in the "Global Changes (manage-21)" menu. However it's possible to change text including such characters by adding the Unicode decimal character combination instead. For the according characters these are

? \\\%3F

{ \\\%7B

' \\\%27

` \\\%60

^ \\\%5E

> \\\%3E

, \\\%2C

So it's possible to change e.g.

<http://Test-Ex-Libris\\%3FURL>

... to ...

<http://Test-Ex-Libris\\%3FTTEST>
