

## Staff user rights for order units

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
- 

### Desired Outcome Goal:

Adding Staff user rights for order units does not show up sublibrary xxx50 but only sublibrary yyy50. What is the reason?

### Procedure:

Adding Staff user rights for order units is only allowed for the sublibrary which is assigned in the user rights as User Library. So if the User library is yyy50 you can only add additional rights, e.g. assign order units, for this library. If you want to add rights for different sublibraries you have to set the User library to ADMIN.
