

## How to define default tab for service page links?

- **Article Type:** General
  - **Product:** Primo
- 

### Desired Outcome Goal:

To define "GetIt Link 1" or "Details" tab to be opened by default, in Primo full record display page (When service page syntax is used to open Primo from external site).

### Procedure:

1. In Primo Back Office Views Wizard select an appropriate service page view.
  2. Open "Tiles configuration" page, select "Brief display" option, select "Brief results" tile.
  3. In the "Define link from title" section, select the "Link to full record display".
  4. Select "GetIt Link 1" or "Details" options
  5. Save and Deploy.
