Question

Which log is used in a Browse Search?

Answer

The jaguar_server.log is used for logging Browse Searches. However, the search is logged ONLY after choosing a link from the results of your initial search.

Additional Information

Search will look like the following:

```
2014-11-12 14:08:40,118 INFO [t-RMI TCP Connection(55947)-55.55.55.55] [c-JaguarParallelIMSearcher] -
JaguarParallelIMSearcher.search() start, for: Q:browse_title:(\"vampire bride\") AND
(scope:(\"01SCOPE\")):01SCOPE:true:400:L::null
```
