

## Printing in v22 GUI ignores print mode settings

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 22
- 

### Question

Why are files from the file list directly printed although we've set the printing mode to "Preview"?

---

### Answer

Use the "Print Configuration" drop down list within the file list window (lower frame) when printing from the file list and NOT the little printer symbol in the right lower corner.
