
Calculate ARC DB size

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 2
-

Question

* How can the required ARC DB size be calculated?

Answer

- * Connect to your Aleph system with ssh
- * Execute script for calculation with the following steps:

```
csh -f $aleph_proc/calcARCsize
```

The result looks similar like this example:

```
USM50 --> 1268 M
```

```
TS_ARC_D size should be : 2032 M  
TS_ARC_I size should be : 871 M  
TEMP size should be : 4096 M  
UNDO size should be : 4096 M  
SYSTEM size should be : 10 G
```
