

## E-mail body text from short-mail

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Desired Outcome Goal:

How to write e-mail body text when sending records from short-mail? Now records are sent as attachment, but the body of the letter is totally empty.

### Procedure:

Change a line in /exlibris/aleph/u21\_1/alephe/tab/send\_mail (under case "NONE"):

Change this line:

```
echo "Content-Type: text/text; charset=UTF-8" >> $TMPDIR/send_mail.$$
```

To:

```
echo "Content-Type: text/plain; charset=UTF-8" >> $TMPDIR/send_mail.$$
```

Afterwards restart the Web server.
