
Error 403 Forbidden" in www_server

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 16.02

Description:

Error 403 Forbidden" in www_server { either http://..... :F (Web OPAC) or http://..... :X (x-server) }

Resolution:

The user's ip address needs to be allowed either explicitly or by default in \$alephe_tab/server_ip_allowed.

This line will permit access to the Web OPAC from all addresses:

```
W A *.*.*.*
```

This line will permit access to the X-server from all addresses:

```
X A *.*.*.*
```

Additional Information

403, forbidden
