
Where does piece identifier map from in EDI invoice?

- **Article Type:** Q&A
 - **Product:** Voyager
 - **Product Version:** 9.1
-

Question

What elements map from the EDI invoice to the piece identifier field?

Answer

For serials, the piece identifier field is populated from IMD+L+085 (invoicing period start volume/issue) and IMD+L+086 (invoicing period end volume/issue).

For monographs, the piece identifier field is populated from IMD+L+080 (volume or part number).

Additional Information

Example for serials: This in the EDI invoice

IMD+L+085+:::109(01/14)'

IMD+L+086+:::109(12/14)'

will map to this in the piece identifier field on the Voyager invoice

109(01/14)-109(12/14)
