## ACQ requests - Aleph RESTful APIs

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Question

Is it possible to limit the number of acq requests which are displayed after a search in RESTful API?

### Answer

Unfortunately it's not possible to limit the number of displayed acq requests. The following limitations are possible:

To retrieve the active acquisition requests list for the patron ID 00000036 in full format, use:

<http://server.name:1892/rest-dlf/patron/00000036/circulationActions/requests/acq?view=full&type=active>

To retrieve the acquisition requests list for the patron ID 00000036 in full format, viewing only requests that have been closed within 40 days, use:

<http://server.name:1892/rest-dlf/patron/00000036/circulationActions/requests/acq?view=full&closed=40>

To retrieve a specific acquisition request's information for the patron ID 00000036, use:

<http://server.name:1892/rest-dlf/patron/00000036/circulationActions/requests/acq/USM5000002386900001>
