
Sorting of items in item list

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 21
-

Question

Sorting of items is not correct as only the year is considered but not the enumeration of issues. What is wrong here?

Example:

2002,149

2002,148

2002,147

...

2002,150

Answer

In item records, tab 5. "Serial levels" only the year "Chron. Level 1 (I) (Year)" is filled but not "Enum. Level.2 (B)" for the issue counting.
