

## tab\_topics.eng for LC call numbers

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

The tab\_topics.eng file distributed by ExLibris is for Dewey Decimal. We need a file that is set up for Library of Congress.

### Resolution:

Two different versions of a tab\_topics.eng table for LC call numbers are attached to this KB entry. One version is called tab\_topics.eng.lc.minimal.txt and only incorporates the very top level of the LC call number breakdown. The other one is called tab\_topics.eng.lc.full.txt and contains pretty much the full breakdown, according to the Library of Congress website (<http://www.loc.gov/catdir/cpsolcco>). Some of the categories have been adapted somewhat, as there is a limit of 40 characters for each topic. You can feel free to adapt it to suit your own needs.
