

## Restrict access to RESTful API / JBoss for IPs

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Desired Outcome Goal:

Restrict access to the RESTful API / JBoss so that it will accept requests only from specific IPs

### Procedure:

Follow instructions from section "Configuring JBoss to Accept Requests Only From Specific IP Addresses" from document "[How to Configure the JBoss Server in Aleph](#) "

### Additional Information

For Aleph version 22 and higher, consult article [Aleph: How to configure Tomcat to accept requests from specific IP addresses only](#)
