

Multiple bcc's in alephcom.ini Mail section

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

Is it possible to have multiple recipients listed in the BccAddress in the [Mail] section of alephcom.ini? I tried it with a space, comma, semi-colon. Any ideas?

Resolution:

Does your site use MS Exchange? If so, if you set up a distribution list with multiple recipients, then you can use the e-mail address of the distribution list in the BCC variable.

Additional Information

global patron details e-mail message cc
