## How to change Not Charged status message in WebVoyage?

- **Product:** Voyager
- 

### Question

How to change item status display from Not Charged to Available?

### Answer

1. Navigate to skin directory: `cd /m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/<skin>`
2. Open `webvoyage.properties` for editing: `vi webvoyage.properties`
3. Find these lines and edit message values:

```
holdings.item.status.1=Not Charged
```

```
page.myAccount.chargedItem.item.status.1=Not Charged
```

4. Save changes.
5. View changes in WebVoyage interface.

### Additional Information

Use similar procedure for changing other item status messages (Charged, etc.)

---

#### Note

There are multiple locations where item stati are configured in the `webvoyage.properties` file. For the sake of consistency you will likely want to change all relevant sections including `holdings.item.status`, `page.myAccount.chargedItem.item.status`, `holdings.item.request.status`, and also possibly `page.searchResults.item.status`.
