
Integrating RDA fields in ACQ reports

- **Article Type:** Q&A
- **Product:** Aleph
- **Product Version:** 20 and up

Question

How to integrate the new RDA fields, such as 264, in the ACQ module reports?

Answer

Bib information in ACQ module is coming from z13, short bibliographic records. Z13 is built according to the settings in xxx01/tab/tab22 and xxx50/tab/tab22.

Change the following lines:

from

```
YEAR 1 008 0008
```

```
IMPRINT 1 260##
```

to

```
YEAR 1 008## 0008 260## c 264## c
```

```
IMPRINT 1 260## 261## 262## 264##
```

Afterwards restart the pc_ server and rebuilt the z13 records using "Update Short Bibliographic Records (manage-07)"
