## Output file for file-96 (orders)

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 22
- 

### Question

When running "Generic Vendor Records Loader (file-96)" no order numbers are displayed in the output ....orders but ADM system numbers. Is that correct?

---

### Answer

Yes, it's correct that not the order number but the z68\_rec\_key (ADM number + order sequence) from z68 record is shown in the output file:

```
01 z68_order \  
02 z68_rec_key \  
03 doc_number .....001067646  
03 sequence .....00001  
02 z68_order_type .....M  
02 z68_order_number .....274793
```
