

Create Summary field 866/867/868

- **Product:** Alma
-

Question

How can a Summary Field (866/867/868) be created automatically based on the 853/854/855 and 863/864/865 enumeration and chronology linked fields?

Answer

The 866/867/868 fields will be created automatically -- if 853/854/855 and 863/864/865 fields already exist in the bibliographic record

The solution is to apply three Normalization Rules for the Holding record:

1. MarcDroolNormalization
2. MARC21 Expand Holding By 863/4/5 Task
3. MARC21 Expand Holding By 866/7/8 Task

See below links to a detailed presentation, a quick video, and reference to the Online Help.
