
Edit OPAC configuration tables in tables navigator (AlephADM)?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Desired Outcome Goal:

Is it possible to edit OPAC configuration tables in tables navigator (AlephADM)? Currently no OPAC tables are displayed in the list.

Procedure:

In general it's possible to edit OPAC tables in ALEPADM module.

Any file which is editable in tables navigator must be listed in the file ".../tab/tab_alephadm.eng" of the library in which the file exists.

In the case of \$alephe_root/www_f_ing the files which you want to edit should be put into \$alephe_tab/tab_alephadm.lng

For example, in order to be able to edit the "login-usm01" page, the "find-b-usm01" page and the "scan-usm01" page in ENG and HEB interface they should be added to \$alephe_tab/tab_alephadm.eng and \$alephe_tab/tab_alephadm.heb as follows:

```
www_f_eng scan-usm01 N L Web scan page
www_f_eng find-b-usm01 N L Web search page
www_f_eng login-usm01 N L Web login page
www_f_heb scan-usm01 N L Web scan page
www_f_heb find-b-usm01 N L Web search page
www_f_heb login-usm01 N L Web login page
```

(see table header for more)

Then, open tables navigator, click "ALEPH", and you will see two directories:

www_f_eng and www_f_heb.

Click these directories and you will see the files and be able to edit them
