

Changing pc_server port

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 20
-

Question

How can the Aleph startup be changed to automatically start the pc_server on port 6998 rather than 6991? The \$alephe_root/aleph_start currently has:

```
setenv PC_SERVER_PORT 699${ALEPH_SUB_PORT}
```

Answer

1. Change the above from:

```
setenv PC_SERVER_PORT 699${ALEPH_SUB_PORT}
```

to:

```
setenv PC_SERVER_PORT 6998
```

2. Enter the command "source aleph_start".
