Question

What statistics queries in SFX Admin Center are relevant to bX usage ?

Answer

Statistics that include bX data are:

*Query 2 (# requests/clickthroughs by source) recorded with the source "info:sid/www.exlibrisgroup.com:bx-menu" – counts # of times a recommendation was selected in the bX menu.

*Query 4 (#requests/ clickthroughs per service type) – the bX service is getRecommendation.

*Query 8 (# of clickthroughs per target service) – the bX target is BX_RECOMMENDER_SERVICE-getRecommendation

*Query 15 (Services preferred over full-text)

Additional Information

No current Statistics query that counts bX recommendation clickthroughs when FullText is unavailable

SID meaning in SFX statistics:

SID = bx-menu - When bX which is integrated in the SFX menu generates an SFX menu the SID is bx-menu

SID = bx-target - When SFX menu is generated by a bX via Primo (recommendations tab) the SID is bx-target. bX via Primo is a tile on Primo and is generated by bX (not by Primo).
