Question

Where is the documentation for HTMLprint.exe and HTMLprint.ini?

Answer

Documentation for HTMLPrint and HTMLprint.ini can be found in the help.chm file which is located in the .\alephcom\bin\ directory on the PC.

Other relevant Article:

https://knowledge.exlibrisgroup.com/Aleph/Knowledge_Articles/HTMLPrint_in_Aleph_22_no_longer_supports_SelectCopy_from_Preview

Additional Information

HTMLprint is activated by the NewPrintType=Y setting in alephcom.ini.

The HTMLprint.exe (Bersoft) software licensed to ExLibris will populate the HTMLprint.ini file with the workstation's locally-defined printers when the user double-clicks on HTMLprint.exe. This updates the HTMLprint.ini file with the appropriate printers and assigns a printer ID number to each printer. The printers defined in the [Printers] section of the HTMLprint.ini file appear to be the only things changed by this action.
