
How to set up 'negative' or 'exclusion' limit?

- **Product:** Voyager
 - **Product Version:** 9
-

Question

Default limits **include** a particular type of record (e.g., ONLY videos). How can a "negative" or "exclusion" limit be configured (e.g., **exclude** videos) for Basic Search?

Answer

1. On the server, cd /m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/{your_skin}
2. vi webvoyage.properties
3. Find "Limit To"
4. Add a new multiple limit (see example in Additional Information). Include all options for limit except the one to be excluded.
5. Save changes.

Additional Information

Example: include all medium/format types except "videorecording"

```
page.search.limitTo.NoVideo=  
page.search.limitTo.NoVideo.limit=MEDI=a|MEDI=c|MEDI=d|MEDI=g|MEDI=h|MEDI=k|MEDI=m|MEDI=s|MEDI=t  
page.search.limitTo.NoVideo.order=4  
page.search.limitTo.NoVideo.text=No videos
```

Note all 'medium' limits defined in {your_skin}/xsl/limits.xml are included **except** MEDI=v (Videorecording)
