

ejournal statistics - report on active unique titles

- **Article Type:** General
 - **Product:** Alma
-

Desired Outcome Goal:

Determine the number of e-journals that are active in the Institution Zone

Procedure:

Perform an Advanced Search on "Electronic Titles" and apply these conditions on the Portfolios:

1. Availability - select "Available"
2. Material Type - select "Journal"

(For a report on ebooks, filter by Material Type = Book)

Additional Information

The reason is that a search on the title level rather than portfolio will avoid listing duplicate titles. Still, currently the above two conditions exist only for the Portfolio level.
