

Fields for printing the hold-request-slip-00.xsl

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 20

Desired Outcome Goal:

How do I know which fields can be used for printing e.g. a hold request slip?

Procedure:

Do the following to determine whether a field is available for printing:

- Print the required template, e.g. hold-request-slip
- Go to client directory .\alephcom\files\xxxxn\print\history\Date*.xml. There you'll find the xmlxsl template and can see all fields that are available. For hold-request-slip the you see the following fields (this is only an extract):
