

List of orders sent per EDI

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 20
-

Question

Is there a way to create a list of all orders sent per EDI after "Send Outgoing EDI messages (edi-11)" ran?

Answer

Actually there is no specific service in order to create a list which contains all the EDI sent orders.

Suggestion:

Directly after p_edi_11 run "General Retrieval Form (acq-02-01)" and search for the order date (date of day) and send method EDI. For creating a list (printout) run "Print Acquisition Records (acq-03)" and select the according fields.

Additional Information

If you run p_edi_11 from the job list you may also add the other services there.
