

Turn on Debugging mode to view Target URLs

- **Article Type:** General
 - **Product:** SFX
 - **Product Version:** 4
-

Desired Outcome Goal:

This feature will enable viewing the Target URL created by SFX when clicking on a target in the SFX Menu

Procedure:

1. In the SFX Admin, under the Troubleshooting category go to the Debugging tab
 2. For Debugging in TARGET SCREEN, enter the IP address of your workstation next to the label 'Restrict debugging to the following IP address(es)'
 3. Check the ON box and click 'submit' to save the changes
-

Additional Information

*Be sure to use a specific IP address for this feature in order to avoid an interruption of service for all users

*If a specific IP address is not inserted and debugging mode is turned on, all users will receive a page with internal code instead of linking to the selected target from the SFX menu
