Question

Table bor-info shows under the activities only xxx51 and xxx52. This should be changed to a more coherent text, e.g. "School lib. (xxx51)" and "Regional lib. (xxx52)". Is this possible?

Answer

The text for this line comes from the library name assigned in \$alephe_tab/tab_base.lng, column 1. So unfortunately this can't be changed. However you might add an additional line (as a title) where a different name can be used.

The following modifications are necessary:

1) Changed the library name in column 3 of \$alephe_tab/tab_base.lng

! 1 2 3 4 5 6 7 8 9

!!!!!!!!!!!!!!!!!!!!!!-!-!!!!!!!!!!!!!!!!!!!!!!-!!!!-!!!!!!-!!!!!!-!!!!!!-!-!!!!!!!!!!!!>

USM51 School lib. (USM51) USM51 N

USM52 Regional lib (USM52) USM52 N

2) Added the following line in \$alephe_root/www_f_ita/bor-info:

<p>

<table cellspacing=2 width="70%" >

\$3500

</table>

</p>

This will create an additional line with the information "School lib. (xxx51)" and "Regional lib. (xxx52)" so that there will be an explanation.
