
Add new field to Reporter .mdb file?

- **Article Type:** Q&A
 - **Product:** Voyager
-

Question

Can fields be added to notices and reports built by Reporter?

Answer

The *.mdb files in [C:\Voyager\Reporter](#) can have fields added if those fields are part of the SIF for that particular notice or report. Only fields/data that the relevant batch jobs gather and place in the SIF file can be added.

Additional Information

See Technical User's Guide chapters on [Acquisitions / Cataloging / Circulation / Media] [Reports / Notices] Standard Interface File for more information on what fields are put into SIF files for each type of report or notice.
