

## Map price to item without Purchase Order?

- **Product:** Voyager
  - **Product Version:** 9
- 

### Question

Can BulkImport map price to item record if the import does not generate a Purchase Order (PO)?

### Answer

Mapping price from a bib is controlled by the mapping fields for creating POs in BulkImport, so only imports that create POs can map Price information into a line item.

### Additional Information

In Voyager 9.0.0 and higher, Pick and Scan can assign a specific value to the Price field in a set of Item records. See the Cataloging User's Guide for more information on Pick and Scan.
