
missing z52.init in VIR01

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 16.02

Description:

We just discovered that our clear_vir process has not been running. KB 3312 addresses our problem (missing), and the resolution states that you provided the file.

Can you please supply us with the file, or tell us where we can find it?

Resolution:

If you have a ./vir01/files/z52.seqaa file, you can copy it as "z52.init" and, using "vi", change any numeric values to "000000000".

If you do not have a z52.seqaa file, you can create one using the Services p_file_03 job (for the z52) and then do the copy as z52.init and edit to "000000000").

Additional Information

clear_vir, z52.init, p_file_04
