Question

Is it possible to add more than one fix routine to a service, e.g. "Generic Vendor Records Loader (file-96)"?

Answer

You can assign only one fix routine name in the service but in xxx01/tab/tab_fix there can be more than one fixes for this routine name, e.g.

```
BNA fix_doc_do_file_08 generic_fix  
BNA fix_doc_do_file_08 delete_fields
```

...

Please make sure that you add the fixes in xxx01/tab/tab_fix in the correct order.
