Question

Is there a batch report which includes each fine owed, with associated bibliographic info? {cir-05 ("Unpaid Transactions Letter") can be used to print notices with the associated bib info, but what is needed is a *report*, rather than individual notices.)

Answer

The cash-09 ("Cash Export Report") submission screen contains an "Update database" option. If this is left as "No" (the default), cash-09 can function as a report of unpaid transactions.

This report can include bib, item, and additional patron info.

1. Add the desired fields to the ./form_eng/bursar-export-report-01.xml file (as shown in Additional Information below). This contains more fields than the bursar-export-report.xml.
2. do util i/6 to recreate the html.pck Print templates package
3. restart the Circ client

In submitting cash-09, specify "No" for "Update database" and "01" for Report format.

Additional Information

Example. Add the following to the ./uip50/form_eng/bursar-export-report-01.xml file

```
<xsl:call-template name="display-grid-gen">
<xsl:with-param name="label" select="Patron barcode"/>
<xsl:with-param name="value" select="/z308-key-01"/>
<xsl:with-param name="type" select="right"/>
<xsl:with-param name="header" select="$header"/>
</xsl:call-template>
```

```
<xsl:call-template name="display-grid-gen">
<xsl:with-param name="label" select="ISBN"/>
<xsl:with-param name="value" select="/z13-isbn-issn"/>
<xsl:with-param name="type" select="right"/>
<xsl:with-param name="header" select="$header"/>
</xsl:call-template>
```

```
<xsl:call-template name="display-grid-gen">
```

```
<xsl:with-param name="label" select="'Item barcode'"/>
<xsl:with-param name="value" select="./z30-barcode"/>
<xsl:with-param name="type" select="'right'"/>
<xsl:with-param name="header" select="$header"/>
</xsl:call-template>
```
