

How to suppress request link from Primo?

- **Product:** Alma
-

Question

How to suppress a Request link from appearing in Primo when full-text services are available?

Answer

The steps are:

1. Go to: Configuration > Fulfillment > Discovery Interface Display Logic Rules
2. Select: "Display Logic Rules"
3. Click: "Add Rule"
4. Choose "Hide Service" > Full Text > refine the conditions as needed
5. Click "Add and Close"

This will hide the request link from Primo if full-text services exist.
