Question

Can Rosetta deliver IEs with multiple viewers?

How to deliver a specific IE using the IA Book Reader, but I'd like the IE to also be delivered using our default delivery method (the General IE viewer), Can I do that?

Answer

1. Create a derivative copy, with a different representation profile (e.g. different Representation Entity Type).
2. Configure a different Representation Profile: Advanced Configuration > Delivery > Representation Profiles Configuration > Representation Profile Details.

Each representation will have different delivery rules.
