Question

How to alter the width of the Holdings Information box in a Record Display?

Answer

1. Navigate to skin directory (... /ui/{skin}) on the server, then to the /css directory (... /ui/{skin}/css).
2. Open displayCommon.css
3. Find the following section and edit the "width:" value to desired size:

```
.bibTags  
{  
width:100%;  
}
```

4. Add comment to file to mark change and save changes.

Additional Information

As with many customizations, there may be other methods for achieving the same result.
