

Changing Icons in Web OPAC

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Desired Outcome Goal:

How to change icons in the OPAC?

Procedure:

All icons are stored in directory \$alephe_root/www_f_lng/icon. To change an icon upload the new one and save it in the according file (overwrite the old file). For security reasons save the "old" one under another name before.

If you want to know which is the correct icon in the Opac do a right mouse click on the icon, then "View image info" (possible in Firefox, not in IE). Then the name of the icon which can be found in above mentioned directory is displayed. Please note that the new icon should be of the same size as the old one.
