
configuration to send SMS messages to library patrons

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Desired Outcome Goal:

How to configure tables to send SMS messages to library patrons

Procedure:

Preconditions to send messages by SMS:

1. The patron has a valid SMS number in his patron card - Address Information node.
2. In the Global Patron Information node the box "Receive SMS" must be checked.
3. Define the sms_server in the \$alephe_root/aleph_start file with Jboss IP and port
4. List forms that will trigger SMS sending in ./xxx50/tab/form_sms table in the ADM library
5. The SMS messages are defined in \$aleph_root/error_lng/sms_messages table.
6. entry 0072 in tab18.lng must be set with the relevant charge.
