

## GUI client packaging mystery, large size

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 20.02
- 

### Question

Packaging the GUI masterclient after the latest Service Pack leads to a file size twice as large as usual. The 'libs', 'doc' and 'files' directories were emptied before packaging. Where does the additional size come from?

---

### Answer

Please check if you have a gui.exe in the directory where MAKEINST2 is placed. If yes this is supposedly the reason for the double size.
